

Company

GROUP 5F offers comprehensive packages of planning, engineering and consultancy services for builders, architects and facade companies. On the basis of our outstanding technical and personnel resources and our wide-ranging network, we are able to react flexibly and efficiently to the demands of modern envelope design.

We are a fast expanding company evolving from a merger of highly specialized Building Consultants and Facade Designers; in 2006.

We are specialising in the planning and development of complex processes and process data for the built environment, with our main focus on Facades

Our goal, is to provide our Clients with time and cost savings from the design through to the realisation of a viable facade by delivering technological consultancy and design services. We represent the view that this goal can be best achieved when the facade technology is coupled to a modern data management system capable of coordinating architectural design solutions with the production machinery for all the component parts.

GROUP 5F sets out to offer innovative process in the realisation of modern facade technologies. We offer an independent team of specialists who can demonstrate all the prerequisites to deliver future-orientated project realisations with most challenging delivery partners in our industry.
