

GROUP5F is an ISO registered company and follows the principles of CDM (Health & Safety) as a core driver for all our designs.

Our work is underwritten by PI insurance of the highest calibre for Europe - our Clients can be totally assured as to the qualifications and competencies of all our staff.

As and when GROUP5F needs to have third-parties to advise or review on design conclusions, we ensure in the first place; that these "partner" suppliers also conform to these standards.
